Summary

Detail-oriented AI Prompt Evaluator with experience in assessing Large Language Model performance across factual accuracy, logical consistency, and instruction adherence. Proficient in developing evaluation rubrics and conducting quality assurance for Thai language prompts, ensuring natural phrasing and cultural accuracy. Proven ability to analyze AI-generated outputs, identify edge cases, and improve model reliability. Seeking to leverage AI evaluation expertise to enhance LLM performance and user experience at your company.

Work Experience

AI Prompt Evaluator (Thai Language), ByteDance Ltd., Remote

04/2026 – Present

- Devised structured evaluation rubrics and "Golden Responses" to establish high-quality, ground-truth benchmark data for assessing Large Language Model (LLM) performance.
- Analyzed AI-generated outputs across dimensions of factual accuracy, logical consistency, and instruction adherence, identifying edge cases and hallucination patterns to improve model reliability.
- Conducted rigorous quality assurance on Thai language prompts to ensure natural phrasing, appropriate tone, and cultural accuracy, bridging the gap between technical AI output and native human communication.
